

AMES

Bookshelf Speaker

You've read "big sound from a small package" before, but if you haven't heard the Ames monitor, you need to discover what you're missing from a diminutive (another word for small) loudspeaker that truly delivers a wide spectrum of sound. Listen to what acoustic suspension technology does for your music, a fitting shout out to the street it is named for. The Ames loudspeaker is a 2-way acoustic suspension design, featuring woven Kevlar drivers with powder-coated die-cast aluminum baskets, braided tinsel leads, custom designed crossovers, an anodized aluminum tweeter with linear response faceplate, and much more, and all in finished MDF, painted in White and Black Satin.
